

A FAIL-SAFE, ACCESS-CONTROLLED EGRESS SOLUTION

A SECURE EMERGENCY EGRESS SOLUTION

Pursuant to International Building Code® Means of Egress Section 10, CrossingGard® combines secured space separation with emergency egress capability. If notified by alarm, if power fails, or if the emergency exit push-button is activated, the grille immediately executes a fully open position with no electrical requirements whatsoever. Post-event, it can resume a normally closed and secure position with the touch of a button.

LOW-MAINTENANCE DURABILITY

The rugged, open pattern provides security and visibility with little-to-no maintenance.

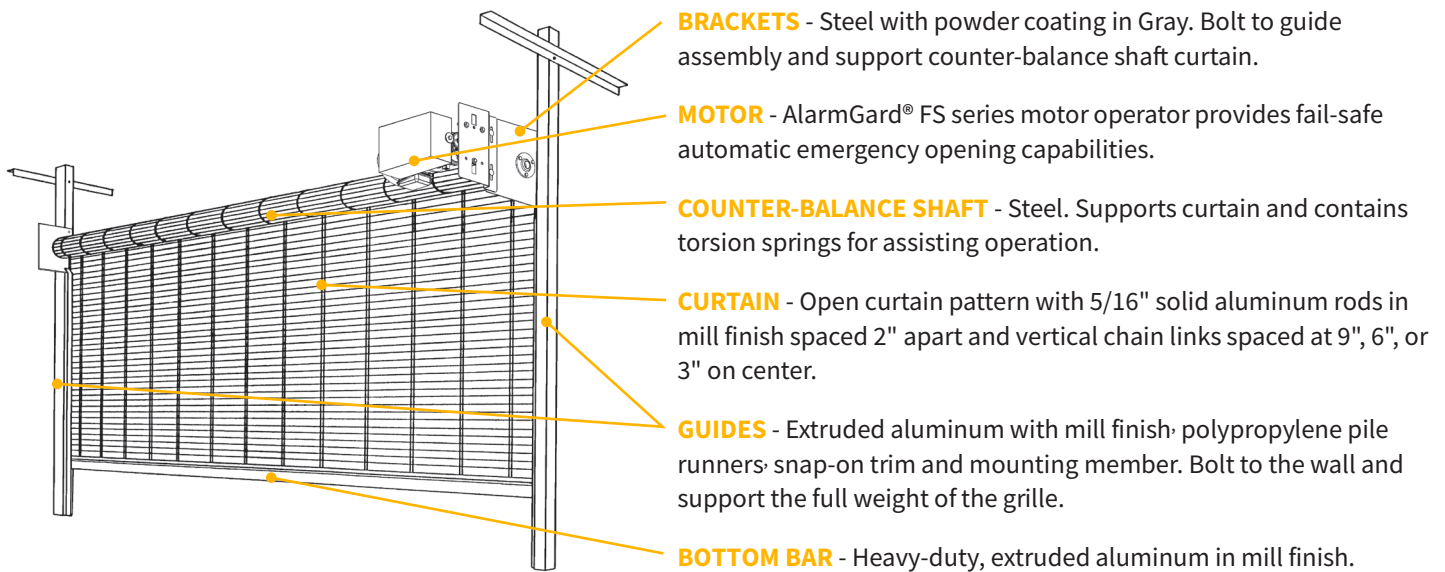

CONDITIONAL SECURITY PERFORMANCE

Manual locking or unlocking is not required. When a forced opening is attempted, the Link AutoLock automatically secures any closed grille (while remaining disengaged during normal and emergency operation).

A SUPERIOR CHOICE FOR SCHOOLS

The CrossingGard provides excellent corridor protection for flexible space requirements, separation control in facilities where emergency personnel need quick access to secure areas, and containment options for openings requiring a means of egress.

STANDARD COMPONENT MATERIALS AND FINISHES

OPERATIONAL AND STRUCTURAL REQUIREMENTS

Motor operation required.

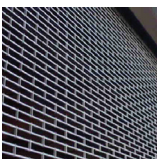

This product is supported by a guide assembly attached to either wall or overhead construction or structural tubes attached to either wall or overhead construction. No additional header support is required unless hood supports are mandated by a larger opening width.

OPTIONAL MATERIALS AND FINISHES

- ▶ Aluminum in Mill, Clear and Color Anodized
- ▶ Stainless steel - 300 series in #4 finish
- ▶ Galvanized steel

Brackets, Guides and Bottom Bar

- ▶ Hot-dip galvanizing on steel components
- ▶ Zinc-enriched, corrosion-resistant powder coating in Gray
- ▶ SpectraShield® Powder Coating in more than 180 colors
- ▶ Hoods available as an option. Galvanized steel with exclusive GalvaNex™ polyester enamel finish in Gray or SpectraShield® Powder Coating in more than 180 colors; aluminum in Mill, Clear and Dark Bronze Anodized Finish and Black Anodized Finish; or 300 series stainless steel with a #4 finish
