

CORNELL®

POWERED BY **LiftMaster**

EXTREME SERIES™

EX3200L SERIES HIGH PERFORMANCE SECTIONAL DOOR SYSTEM

The Cornell® Extreme Series™ High Performance Sectional Door System boasts an average opening speed of 24" per second, allowing productivity to flourish while delivering the aesthetic you're looking for. Tandem nylon rollers improve roller life and reduce running noise for smooth, quiet operation while safety stays top of mind with enhanced features such as 3' of light curtain protection, a cable management system and standard cable tension monitors.

STANDARD SPECIFICATIONS

Max Width	16'2"
Max Height	14'0"
Max Door Weight	1,000 lbs
Upward Travel	24" per second
Downward Travel	15" per second
Door Thickness	2", 1-3/8"
Insulation	Polystyrene
R-Value*	Up to 9.1
U-Factor	0.23 (2" thick door) [†] 0.27 (1-3/8" thick door) [†]
Air Infiltration	0.34 cfm/ft ² (2" thick door) 0.41 cfm/ft ² (1-3/8" thick door)
Thermal Break	Continuous foam
Stiles	Double end stiles (standard)
Glazing Available	Tempered, insulated tempered, acrylic and polygal
Springs	50,000 cycle standard [‡] (Max cycles available on a single shaft line)
Track Size	2" angle mount track standard 3" track where applicable
Track Type	Standard lift, high lift and full vertical lift

*Calculated door section R-value is in accordance with DASMA TDS-163.

[†]U-Factor based on solid door.

[‡]Cycles can vary depending on door configuration.

CORNELL® EXTREME SERIES™ OPERATOR POWERED BY LIFTMASTER®

The Extreme Series™ High Performance Sectional Door System features a direct drive operator with an opening speed of 24" per second and up to 600 cycles per day. The display's easy-to-read user interface provides ease of limit-setting at floor level and can connect to the operator via Wi-Fi to myQ® Facility.

SAFETY FEATURES

UL325 approved light curtain that reverses the door's downward motion when the beam is broken

Cable tension monitor that mitigates door operation when cable slackening occurs

Optional wireless bottom safety edge that reverses the door's downward motion upon contact with an object

PERFORMANCE REQUIREMENTS

Average Opening Speed	24" per second
Average Closing Speed	15" per second
Max. Door Weight	1,000 lbs.
Warranted Cycles	600 cycles per day over 2-year warranty period
Drive System	Direct drive

INSTALLATION AND COMMISSIONING

Motor Design	1.25 HP configuration serving single phase 115V/230V and 3-phase 230V configurations; 3-phase 460/575V available with accessory transformer
Wall Controller	Separation of low and high voltage wiring – includes functionality of 3-button station, PLUS setting door profile, programming limits, diagnostics
Programming	Complete the following programming at floor level: set limits; choose door profiles for speed; set operating modes; select photo entrapment devices
Display	Provides textual status indications including: ■ Absolute cycle count ■ Service cycle count ■ Diagnostics messages ■ Door/operator status
Cycle Counter	Re-settable cycle counter via the wall controller and/or through myQ® Facility
Limit Setting	Simple electronic push-button setup via the wall controller

CONNECTIVITY

Wi-Fi Connectivity	Connectable solution via built-in Wi-Fi
myQ® Facility Subscription	First year myQ® Facility subscription included
Over-the-Air Updates	Standard via Wi-Fi
Service Cycle Count	On wall controller display; standard via myQ® Facility
Lifetime Cycle Count	On wall controller display; standard via myQ® Facility
Remote Diagnostics	On wall controller display; standard via myQ® Facility

COLOR OPTIONS

*Additional charges apply.
Due to the printing process, colors may vary.

CUSTOM PAINT OPTION

Color Blast® finish offers more than 1,500 Sherwin-Williams® color options to complement your building design. This durable two-part paint system has been thoroughly tested and is backed by a five-year warranty.

Due to solar reflective formulation to meet greater than a 38 LRV, some colors may not be available.

WINDCODE®

Design pressures (DP) up to 36 psf depending on door size, configuration and exposure. Models tested 50% greater than DP.

Building code officials, builders, insurance companies and building owners are increasingly aware of the need for structures to withstand high winds resulting from hurricanes, tropical storms and other weather related events.

With the introduction and adoption of the International Building Code in most areas of the U.S., wind load is no longer an issue exclusive to Florida and other hurricane prone areas.

Clopay Corporation has developed a unique WindCode® door ID program to help you select the right garage door. It includes factors like local building code, MPH requirements, exposure level and mean roof height.
